FAQ's

What is the Explore treatment?

Explore is a non-invasive and invasive Fractional Radio frequency device.

How does it work?

Dermal heating and micro-needling are combined to induce micro-wounds which provide ablation, resurfacing, skin tightening and anti-ageing rejuvenation.

FAQ's *continued*

What does the procedure feel like?

The Explore creates minimal pain thanks to the advanced micro-needling technology. Clients may choose to use a numbing cream as a precaution.

How long is a session?

The procedure will take 1 hour including pre and post care.

How long will the results last?

This will depend on the clients skin condition and lifestyle, but typically the results will last for 3-10 years.

How much time am I going to need?

The Explore treatment has minimal downtime. The swelling will calm down within a couple of hours and normal activities resume the next day.

How many sessions will I need?

The number of sessions will depend on skin condition to be treated. But on average 2-3 treatments 4 weeks apart.

Is there any down time?

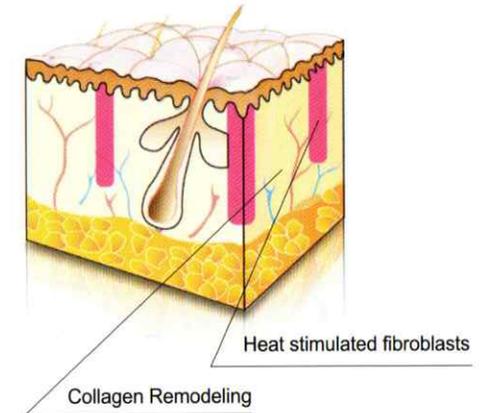

The skin may be slightly pink but this will only last a few hours. There is no need for time off work or cover up.

When will I see results?

Results will be seen immediately and clients will see optimal results 6 months after treatment.
